DEAR CHUCK E...

Hello, my name is Maureen and I visited the location on Cherry Hill today. I wanted to let you know about a very kind and compassionate employee named Dora. While waiting to have my hand scanned to leave with my group, Dora noticed I didn't look well. She asked me if I was ok and I said "YES". She asked again and I said "I don't think so". Dora immediately escorted me to a table. By escorted, I mean took me under my arm and held my hand. I was suffering from extreme low blood sugar. I am an insulin dependent diabetic and have been for most of my life. My group returned to stay with me until I started to drink fruit punch, make sense, and regain my strength. Dora was right there the entire time keeping a close eye on me. (The manager came out and checked on me several times. One of the two knew enough to ask if I had eaten.) In today's world I know company's get mostly negative feedback. I wanted to make sure you knew of the events today and how wonderful your employee was.

I am writing because I wanted to let someone know what a good experience we had at Chuck E. Cheese today. We visited the Corpus Christi, TX location around 1:00. It was incredibly busy but was being run very efficiently. The line moved quickly and when one of the games ran out of tickets, there was someone on the floor who fixed it right away. We also had an employee come by the table we were sitting at and clear away the trash for us when we were done eating and watching our kiddos play. We have been to this location when it was significantly less busy and it did not go as smoothly as today. Kudos to your management and team in the store today. They did a great job!

Our host Ramone was amazing! My daughter had been looking forward to her party at Chuck E. Cheese for months and was not disappointed. Ramone did an excellent job at keeping on time with things, making sure everyone had what they needed, and more! Thanks Ramone for making my daughter's 5th birthday one she will remember.

RISK MANAGEMENT

Stopping Germs at Work

How Germs Spread

The main way that illnesses like colds and flu are spread is from person to person in respiratory droplets of coughs and sneezes. This is called "droplet spread." Sometimes germs can be spread when a person touches respiratory droplets from another person on a surface like a table and then touches his or her own eyes, mouth or nose before washing their hands. We know that some viruses and bacteria can live 2 hours or longer on surfaces like tables and doorknobs.

How to Stop the Spread of Germs

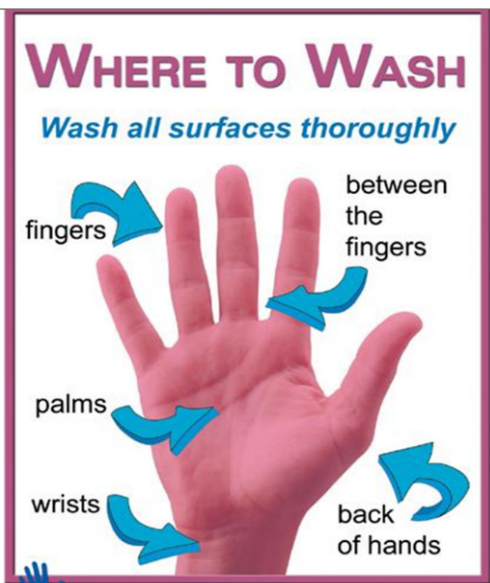

In a nutshell:

- Cover your mouth and nose
- Wash your hands often with warm water and soap.
- Clean surfaces frequently i.e. tables, benches and counter tops.

Cover your mouth and nose when coughing or sneezing

Cough or sneeze into a tissue and then throw it away. Cover your cough or sneeze if you do not have a tissue by coughing or sneezing into your sleeve. Then, clean your hands, and do so every time you cough or sneeze.

Wash your hands Frequently-- with soap and warm water --to ensure that you wash for 15 to 20 seconds. That's about the same time it takes to sing the "Happy Birthday" song twice!
